

Consultancy

Metering

Need help in procuring your gas and electricity commercial meters and supply contracts?

OVERVIEW

In conjunction with our partners, we offer a commercial meter installation and energy supply contract service aimed at the construction industry.

Whether for a temporary builders supply (TBS), permanent landlord or other commercial supply, we can take the hassle out of coordinating the connection of metering and sourcing of energy supply contracts.

For smaller schemes we will identify a suitable supplier and source a single commercial contract. For larger schemes we will run a competitive market tender to gain the best value from the market.

WHY CHOOSE US?

With our partners we have over 25 years energy market experience. We can source competitive contracts with significant energy savings for your development. We take the complexity out of the process by managing this on your behalf.

ELECTRIC

- To obtain electric Meter Point Administration Numbers (MPANs)
- Procure commercial electricity supply contract and meter provision
- To approach the Energy Supplier market to obtain quotations for new direct current or CT meters for large supplies
- To liaise with the appointed Energy Supplier to register the site ready for meter installation
- To liaise with the Energy Supplier, post-acceptance, to book meter installations and "head end" energisation where necessary

GAS

- To obtain gas Meter Point Reference Numbers (MPRNs)
- Procure commercial gas supply contract and meter provision
- To approach the Energy Supplier market to obtain quotations for new commercial gas meters
- To liaise with the appointed Energy Supplier to register the site ready for meter installation
- To liaise with the Energy Supplier, post-acceptance, to book meter installations and commissioning

TIMESCALES

- 🕒 We advise clients to allow up to 3 months to source an energy contract, install meters and energise new commercial supplies

LETTER OF AUTHORITY

- 👤 Client to provide a standard Letter of Authority, template provided by PES, authorising PES to act on their behalf
