

Consultancy

Metering

Need help in procuring your gas and electricity commercial meters and supply contracts?

OVERVIEW

In conjunction with our partners, we offer a bespoke commercial meter installation and energy supply contract service aimed at serving the Construction Industry.

WHY CHOOSE US?

There are significant benefits in co-ordinating the installation of commercial meters, with the procurement and installation of the utility infrastructure.

This is a complimentary service to our new connections and project support offerings and can save time and money on development schemes.

ELECTRIC

- To obtain electric Meter Point Administration Numbers (MPAN)
- Procure commercial electricity meters
- Approach the energy supply market to obtain contracts for new commercial direct current or CT supplies (over 200amp)
- Liaise with the appointed Energy Supplier to register the site ready for meter installation
- Liaise with the Meter Operator (MOP) to book new commercial meter installations
- Book meter installations and energisation, where necessary

GAS

- To obtain gas Meter Point Reference Numbers (MPRN)
- Procure commercial gas meters
- Approach the energy supply market to obtain contracts for new gas meters
- Liaise with the appointed energy supplier to register the site ready for meter installation
- Liaise with the Meter Asset Manager (MAM) to book new commercial meter installations
- Book meter installations and commissioning where required

TIMESCALES

- 🕒 We advise clients to allow up to 3 months to procure information and applications

LETTER OF AUTHORITY

- 👤 Client to provide a standard Letter of Authority, template provided by PE, authorising PE to act on their behalf
