

Consultancy

Metering

Need help in procuring your gas and electric commercial meters and supply contracts?

OVERVIEW

In conjunction with our partners, we offer a bespoke commercial meter installation and energy supply contract service aimed at serving the developer and related markets.

WHY CHOOSE US?

The added benefit of appointing Premier Energy (PE) to organise your supply contracts is that over time we will be monitoring the usage on each meter and gather information on typical consumptions, so future planning of new connections can be more accurate.

We will be compiling a database of typical consumptions, especially for TBS's, in order that a more realistic assessment of load and capacities of TBS can be established and specified on future projects. The benefit will ultimately be the potential saving of money by not oversizing future connections, especially with the possibility of added reinforcement cost, and procuring the right energy contract.

ELECTRIC - 100AMP SPN, TPN & CT METERS

- To obtain electric Meter Point Administration Numbers (MPAN)
- With our partner, approach the energy supply market to obtain contracts for new commercial direct current or CT supplies (over 200amp)
- With our partner, liaise with the appointed Energy Supplier to register the site ready for meter installation.
- With our partner, liaise with the Meter Operator (MOP) to book new commercial meter installations
- With our partner, to book meter installations and energisation, where necessary

GAS - U SERIES, G SERIES & ROTARY METERS

- To obtain gas Meter Point Reference Numbers (MPRN).
- With our partner, approach the energy supply market to obtain contracts for new gas meters.
- With our partner, liaise with the appointed energy supplier to register the site ready for meter installation.
- With our partner, liaise with the Meter Asset Manager (MAM) to book new commercial meter installations.
- With our partner, to book meter installations and commissioning where required.

TIMESCALES

- 🕒 3-5 days to provide a contract
- 🕒 2hrs - 24hrs for client to accept contract depending on market conditions
- 🕒 10-15 working days notice to register MPAN and book in meter
- 🕒 Optimum timeframe for submitting meter install requests is 1-2 months prior to desired installation date

LETTER OF AUTHORITY

👉 Client to provide a standard Letter of Authority, template provided by PE, authorising PE to act on their behalf for the purpose of :-

1. Accessing and holding data on an electronic database, information relating to our clients' electricity and gas
2. Analysing our clients' supply data and obtaining additional information which may reasonably be required
3. Receiving our clients' copy invoices and related documentation
