# Utility Search
Prime

The Prime is an entry-level search detailing key utilities in and around your enquiry area.

OVERVIEW

We make enquiries to the core utility companies (electric, local water & drainage, gas, Openreach (BT), independent gas and electric companies (IGT's/IDNO's) and LinesearchbeforeUdig to obtain their asset maps and issue to you in pdf report format via email or file transfer.

WHY DO I NEED THE PRIME REPORT?

#SearchFirstDigLater for utilities greatly reduces the chance of dangerous and expensive cable strikes or damage to other utility assets.

We classify the search responses received in terms of their proximity to the enquiry area using a red, amber and green system (RAG rating) which enables the reader to quickly pinpoint utilities of concern.

WHO NEEDS THIS REPORT?

- For individuals who need core information for minor works such as new dropped kerbs for access to front drives
- For developers who need a quick overview of potential problems before deciding to continue with due diligence in land acquisition
- For contractors looking to decide if it's worth pursuing a tender opportunity
- For anyone looking for minimal information at an entry-level cost
