

Utility Map PALM 128®

The only PAS 128 Level D compliant utility map that transposes all asset information onto an OS MasterMap base.

OVERVIEW

The Premier Asset Layered Map (PALM 128) is a multi-layered interactive map which can toggle between single or multiple utility views at the touch of a button. By selecting and deselecting utilities, you can easily build a detailed picture of utility information on your project.

WHY DO I NEED A PALM 128?

As a specialist utility consultancy we understand the importance of reliable, quality information at your fingertips in order to make decisions on the viability of projects or comply with H&S legislation.

The PALM 128 is available in multiple formats: PDF, DWG as well as GIS formats. The PALM can be viewed on handheld devices making it an invaluable reference for on-site operatives. The PALM 128 makes utility information available to everyone in an easy to use format that will help reduce damage to utility assets or worse still cable strikes that could lead to H&S investigations.
